

## A Review of Selected Timeline Applications

*Patty Meek*

### **Capzles**

<http://www.capzles.com>

Capzles is a timeline like presentation of multimedia content. It let's you create a timeline of 'floating photos' – like a photo documentary. It doesn't appear to provide much space for text to describe the images. There is potential for multiple, but separate, timelines. It is free to use.

### **xtimeline**

<http://www.xtimeline.com>

Xtimeline is a straight forward web-based timeline application. It provides a single axis with years, months, etc. It also provides the ability to 'layer' events of a sort; kind of like 'bullets' overlapping. It is free to use.

### **Read•Write•Think Interactive Timeline**

<http://www.readwritethink.org/files/resources/interactives/timeline/index.html>

This is a basic timeline for younger students. It enables students to type in as they go. There is not currently a way to save them. You can only print them.

### **TimeRime**

<http://www.timerime.com>

TimeRime is one of the more advanced timeline applications available. You can overlap events, post pictures, and zoom into window to provide information about the pictures! There is a fee to use TimeRime.

### **Dipity**

<http://www.dipity.com>

Dipity is another fully functioning interactive timeline application like TimeRime. Dipity is free to try but you might shortly need to upgrade to a paid account. According to its website, "users can create, share, embed and collaborate on interactive, visually engaging timelines that integrate video, audio, images, text, links, social media, location and timestamps."
